CITY OF WASHINGTON, GEORGIA

BOIL WATER ADVISORY LIFTED

Date: 6/24/2026
Public Water System ID (PWSID): GA GA3170002

The **City of Washington Water System** is **officially lifting the Boil Water Advisory** that was issued on **6/22/2026 for the Upton Mill and old Thomson Rd. Area**

Following the restoration of water service and system pressure, the City collected and analyzed the required **bacteriological water samples** in accordance with **Georgia EPD standards**. All laboratory results have confirmed that **no microbial contamination is present** and that the water **meets all state and federal drinking water quality standards**. [epd.georgia.gov]

As a result, the drinking water is now **safe for all normal uses**, including:

- Drinking
- Preparing food and baby formula
- Making ice
- Brushing teeth
- Washing fruits/vegetables
- Giving water to pets

WHAT CUSTOMERS SHOULD DO NOW

To ensure fresh water throughout your plumbing system, customers are advised to:

- **Flush all household faucets for at least two (2) minutes** before using water for drinking or cooking. [epd.georgia.gov]
- Run refrigerators with in-line water/ice makers through **three cycles** to clear old water.
- Replace or rinse any **point-of-use filters** (such as pitcher filters, refrigerator filters, or under-sink filters) according to manufacturer recommendations.
- For more Information Please call City Hall at 706-678-3277
