City of Washington, Georgia

The City Water Department will be performing maintenance beginning at 7:30 a.m. on Monday, July 20. Work is expected to take approximately 2–3 hours.

Customers in the following areas may experience a temporary interruption in water service:

- **Poplar St. to Depot St. along Robert Toombs Ave.**
- **Spring St. from Liberty St. to Robert Toombs Ave.**

Businesses and residents around the Square should continue to have water service, though water pressure may be lower than normal during this time.

We appreciate your patience as we complete these necessary improvements to our water system.
